# AFRICAN VIOLET PLANTS

LATEST INTRODUCTIONS AND OTHER STANDARD VARIETIES

THE HARMON NURSERY

PROSPECT

OPEN WEEK DAYS—CLOSED EVERY SUNDAY

We ship violets in the pots. Well established plants in clay pots, securely wrapped and taped and carefully packed to protect against damage. We guarantee safe arrival. All plants are labeled. Instructions for care included in each shipment. We have been shipping African Violets now for six years, and we have learned about handling and shipping. This year we offer many of our varieties in larger three inch pots (these plants are 10 to 12 months old) and are in BLOOM. We ship them IN THE POTS. Many of our new varieties are offered in bloom in these large THREE INCH POTS. Please NOTE EACH VARIETY.

Violets cannot be shipped safely in cold weather so the best time to obtain these new varieties is thru the warm summer months. Thru June to September, we ship these fine plants in ventilated cartons. By getting your plants in warm weather you are assured safe delivery and you can get them well started for brilliant bloom thru the fall and winter. Blooming African Violets make beautiful and very acceptable birthday gifts and Christmas Gifts. But they cannot be shipped safely at Christmas time. For your special friends, we suggest that you get your plants now and have them well started and in bloom for Christmas gifts. We have Special Pots, Soil and Plant Food to help you. We have been shipping African Violets for six years. We have been shipping hardy garden plants for over thirty years. We are very sure we can pack and ship the plants so they will reach you in good condition. ORDER NOW.

## A FEW POINTERS

Water violets about every three days.

Never use cold water. It should be luke warm (100 deg.)

Rain water is best. Well water is O. K. City water that is treated with chlorine, salt or soda ash should be used carefully. Fill a bucket and let stand over night. Use the top two-thirds. Violets do not like chlorine or soda ash.

Violets like to be warm. 65 to 85 degrees. A sudden chill will cause them to lose their bloom.

Violets like some sunlight, but not too bright. If plants are in a sunny window, shade them with a curtain or screen made of cheese cloth. Shade from 9:30 to 5:00 in summer.

Violets do not like open flame gas heaters. They will lose their bloom if you use the heater.

Violets cannot be forced too fast. Sometimes they require five to seven weeks to bloom after shipment or repotting.

We feed our violets GRO-MOR Plant Food at least once a month.

For more detailed instruction we recommend the book "The African Violet" by Helen Van Pelt Wilson. We can supply it at \$2.95 postpaid.

### HOW VIOLETS ARE PACKED

African Violets are shipped in the clay pots in which they were grown (**Except Air Mail**). They are securely wrapped and taped to protect against damage. We guarantee safe arrival. Air Mail shipments are always packed in fiber pots. All plants are labeled. Instructions for care included in each shipment.

**YELLOW VIOLETS**—As yet there is no yellow African Violet in existence. We cannot supply yellow violets.

**VIOLET LEAVES**—We do not sell African Violet leaves.
